Subject: Big CAC meeting on Wednesday
Date: 11/14/2011 08:30 PM
Importance: Low

I was getting ready to send out the agenda and I wanted to check in with you. This is the “big” meeting and people come in person from out of town/elsewhere because their expectations are to get more of a technical presentation on the issues like in other meetings. Gary, I understand, will not be there and participating by phone so I just wanted to check in about the meeting presentations were going to work. In the past, we have in-depth powerpoints. Will you be sending those so I can send out to CAC? Like I had said before, since a big CAC has not been held in a number of months, you can reuse some of the slides from the community meeting also.

Also, Dr. Armendariz had come down here last Wednesday when I had invited him to the Houston Bar Association’s Environmental Section luncheon to talk about air issues (I am the chair of that) and Commissioner Morman and County Attorney Ryan introduced him and recognized him and EPA for the efforts on San Jacinto. They also presented him with a framed photo from the commissioners court with their signatures. This was well-attended by over 90 folks and Francis Chin from waste management was also in the audience.

Thanks,
Snehal
